That sounds good.

Cindy:

Thanks and I appreciate your suggestion on organization. At this point, I think we'll focus on the release and maybe go back and do some reorganization next week. As to the organization your discussed - I like it with single exception that I think we needed to be careful intermingling links to a .gov and .org websites as it could be confusing to the public who is representing the data as accurate. Having said that - we do have a general link to OSCnet on the page since it does contain site information.

Thanks,

Paul

Subject: R2, R6, and R9 Lab Reports

Paul,

I have moved the FTP final lab reports from R2, R6, and R9 to the L:.

L:\....\Dimock Residential Site\FOIA Docs\2012 Lab Reports\Region 2 Lab Reports  
L:\....\Region 6 Lab Reports  
L:\....\Region 9 Lab Reports

These are all pdf files.

R2 and R9 do not include emails or COC forms so I don't see anything needing redaction.

R6 includes COCs and there are initials on the results pages (if there's an issue with the initials I'll need to check to see if these are not EPA's)

I looked at the screen shot and have the following suggestions:

Raw Data - If only having one link then change the name of the link to:

*Lab Reports with associated Raw Data*

or

*Lab Reports and Raw Data*

If time allows I would suggest having the following structure to help the user have the big picture:

Link to ??? page with the Executive Summary, DV Procedures, SERAS DV procedures documents

Link to OSC page with the reports that were sent to homeowners

Link to OSC page with the compilation reports

Link to Lab Report files for all labs/all samples

Sorted by Lab

Link to Raw Data files for all labs/all samples

Sorted by Lab

Sorted by Work Order/Lab Project ID

Sorted by Parameter (R3 has metals, organics, etc.)

I will continue moving the FTP final lab reports for all the other labs to the L: in case you want this more tiered structure. I'll send a separate email on those.

Cindy
